Allowable Subject Matter

Claims 3, 5, 11, 24, 26, and 32 are allowed.

The following is a statement of reasons for the indication of allowable subject matter:

In regards to the independent claims 3 and 24, the prior art found does not teach "the information providing apparatus comprises operation information input means inputted with operation information based on selection operation, and switching means for switching a menu screen in an upper layer on which the group icons are arranged, to a first menu screen in a layer lower than a selected group icon, with a predetermined first transit screen inserted therebetween, the operation information entails operation keys, which are simultaneously operated, the switching means gradually enlarges the selected group icon on the first transit screen, to zoom in onto the group icon, and gradually fades display of the selected icon onto which the display is zooming in, on the transit screen, to switch the display to display of the first menu screen in the lower layer, the position and size of the frame-like mark are kept fixed during enlarging of the selected icon, and the information screen, the transit screen, and the menu screen display a title indicating a presently focused icon in an upper portion of each screen;" in combination with all of the other claim limitations. It is important to note that the Examiner is interpreting the claim limitation, "the position and size of the frame-like mark are kept fixed during enlarging of the selected icon" to include the displaying of the frame-like marker during the enlarging step. This limitation is illustrated in Figures 15A through 15C where frame like marker (W) is displayed while the icon enlarges.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
